MUHAMMAD SALMAN HASSAN

Manual QA Engineer | Software Tester (Web, API, Fintech)

Karachi, Pakistan · +92 335 8655119 · msalmanhassan288311@gmail.com · LinkedIn · GitHub · Portfolio

SUMMARY

Detail-oriented QA engineer with 3+ years of hands-on software engineering experience on fintech and high-volume messaging platforms, bringing a developer's understanding of where systems break. Skilled at writing clear, reproducible bug reports supported by Loom recordings, HAR network logs, and step-by-step test cases. Independently reported a defect on the Upwork platform that was escalated to Upwork's Technical Team and formally recognized by Upwork Support.

CORE QA SKILLS

Testing Types	Functional, Regression, Smoke, Exploratory, UI/UX, Cross-browser, Responsive / Mobile Web
Test Artifacts	Test Plans, Test Cases, Test Scenarios, Bug Reports, Test Summary Reports
API Testing	Postman (REST endpoints, status codes, payload & auth validation)
Debugging	Chrome DevTools, HAR capture & analysis, Network / Console inspection, Log analysis
Tools	Jira (defect lifecycle), Git, GitHub, Loom, Docker
Data Validation	SQL (MySQL), Redis / BullMQ queue state checks
Process	Agile / Scrum, SDLC & STLC, Severity / Priority triage
Tech Background	JavaScript, TypeScript, React.js, Node.js, Express.js, Microservices

QA HIGHLIGHT

Independent Bug Report: Upwork Platform 2026

- Identified and isolated a platform defect; documented it with step-by-step test cases, Loom reproduction recordings, and a network HAR file.
- Upwork Support forwarded the full technical breakdown to their Technical Team for resolution and awarded 30 Connects in recognition; invited to submit through Upwork's official Bugcrowd program.

EXPERIENCE

Software Engineer · **eOcean Pvt Ltd, Karachi** Jun 2025 – Present

- Work on xNotify, an enterprise SMS/WhatsApp notification platform processing millions of messages daily; validate delivery flows across microservices, contributing to a 20% improvement in delivery reliability.
- Test and debug Node.js APIs using Postman and log analysis, isolating bottlenecks that led to a 25% reduction in API response times.
- Built and tested the Kistpay WhatsApp lending bot, covering conversation flows, invalid inputs, and failure paths; increased automated onboarding by 35%.

Software Engineer · **Kistpay Pvt Ltd, Karachi** Feb 2023 – Jun 2025

- Ensured quality of the customer installment checkout portal through cross-browser, responsive, and release regression checks; improved checkout conversion by 15%.
- Reproduced, reported, and resolved defects in Jira within Agile sprints; reduced Time-to-Interactive by 28% and bundle size by 22%.
- Validated lending dashboard data against database records and Redis/BullMQ queue states.

Frontend Developer (Junior) · **KDYS Labs, Karachi** Aug 2022 – Feb 2023

- Verified Figma-to-UI accuracy and cross-browser compatibility (Chrome, Firefox, Safari, Edge) across responsive breakpoints.

PROJECTS

- **xNotify – Enterprise Notification Platform** (Node.js, React.js, Microservices): end-to-end validation of delivery status tracking across distributed services.
- **Kistpay Lending Dashboard** (React.js, Redis, BullMQ): real-time queue monitoring; verified job states, retries, and data consistency.
- **ThinkMoves – Chess Analyzer** (React.js): move-evaluation tool; handled edge cases in PGN parsing and blunder detection.

EDUCATION

BS Computer Science · Federal Urdu University, Karachi (GPA 3.45 / 4.00) 2019 – 2023

RECOGNITION

- Recognized by Upwork Support for a detailed platform bug report (2026)
- Top Rated Freelancer on Upwork
- xNotify (team product) featured in Forbes; Best XaaS Solution, Global Connectivity Awards
